Rent Manager

Rent Manager Scripting Prep

The checklist below gives a basic overview of the content covered by the Rent Manager Scripting Certification assessment. This certification shows that you've demonstrated the ability to read, interpret, write, and troubleshoot scripts in Rent Manager.

	TASK	POINTS	PREPARATION
◯	Understanding Parameter Default Values	10	Identify the default value for a function parameter in a script.
◯	Defining Scripting Syntax	10	Provide the correct character for a variety of scripting elements.
◯	Defining If Statement Syntax	10	Provide the correct sequence of characters for writing conditions within an If statement.
◯	Identifying Proper Scripting Syntax	5	Given a list of possible scripts, choose the one with the correct syntax.
◯	Identifying Insertable Fields	10	Select an insertable field to use based on a description of its output.
◯	Writing System Variables	9	Compose Report Writer system variables.
◯	Write a Script with Fixed Parameter Values	10	Write a script that contains fixed values in its parameters.
◯	Understanding Nested Scripts	10	Given an output value, identify the script that would result in that value.
◯	Identifying Variable Values	12	Given a script, identify the variable values within the script when run.
◯	Write a Script with a Variable Parameter Value	10	Write a script that contains a variable value in its parameters.

TASK	POINTS	PREPARATION
Write a Script with Fixed and Variable Values	15	Write a script that contains a combination of fixed and variable values in its parameters.
Combine Insertable Fields	10	Combine insertable fields to return a value.
Understanding Contact Indexing	10	Identify the index value of specific contact.
Understanding Lease Indexing	10	Identify the index value of a specific lease renewal.
Understanding class associations	10	Find the correct link between two class types.
Comparing Logical Examples	10	Given a sample If statement, identify its logical equivalent.
Fixing While Loops	10	Identify the proper way to correct a "broken" While loop.
Understanding While Loops	8	Explain the different syntax elements of a provided While loop.
System Functions	10	Describe the result of running a letter with a specified "system" function.
Recommend Report Types	10	Identify which Report Writer template type would be best to create a report that addresses a specific business need.
Financial Report Writer Elements	8	Identify the purpose of different parts of Financial Report Writer.
Modifying A Financial Report Writer Template	10	Modify a Financial Report Writer template to accomplish a goal.
