MANAGED
IT Services

powered by **LCS**

Data is the backbone of your business operation. Our team of highly skilled professionals provide your company a comprehensive, layered security system— maintaining the integrity of your IT infrastructure and keeping your data in peak condition, so you can focus on building your business.

Managed Means Monitored.

Our team is continually monitoring your software and hardware, so you can rest easy knowing your systems are always working for you.

Automated Antivirus Protection.

Daily scans and real-time updates are completely automatic, ensuring the highest level of security against viruses and malware. With Bitdefender's comprehensive structure of proactive, detective, and reactive securities in place, you're equipped with the best tools available for data breach protection.

Daily Health Checks.

We'll see a problem with your PC or server well before it's a catastrophe—immediately and proactively correcting any issues, rather than reacting to an emergency.

Asset Tracking.

Receive real-time reports that give you an instant snapshot of your current IT environment—identify aging equipment, failing software, or simply keep an ongoing inventory of your IT assets.

Robust Backup and Recovery Solutions.

With up to 28 days of continual data backup available on-demand, your systems can easily and quickly be restored to a specific date, time, or designated safe state. Your data is encrypted before it ever leaves your system, and is securely stored in the United States.

With **Managed IT Services powered by LCS**, you can rest assured that your data is safe and secure. With our quick and easy set-up, your customized data security system can be in place in less than 24 hours, and protection begins immediately. If you ever need hands-on assistance, our team can access your system via the remote Take Control feature, troubleshooting directly within your IT environment to find you the best, fastest solution.

Contact your IT Sales Representative for more information on securing your data through LCS' Managed IT Services today.
